

Non-metallic Threaded and Barbed Duct Couplers

TELECOM OUTSIDE PLANT

TUFF-Link couplers are non-metallic high-pressure rated airtight couplings for polyethylene conduit and innerduct.

The TUFF-Link plastic duct coupler is specifically designed for both press-on and thread-on airtight connections of HDPE duct. It provides a stealthy profile that will not snag on a plow chute. It features high tensile strength plastic with exceptional resistance to side load pressure for maximum durability.

Airtight and watertight coupling or splicing of conduits and innerducts reduces cable pulling and blowing resistance. These features also allow for greater freedom of use of state-of-the-art cable placement technologies, such as high-pressure cable propulsion.

Benefits:

- All Plastic Construction – Corrosion-proof
- Unique Threaded-and-Barbed Design
- Excellent Independent Test Results, Even At –17 degrees F (–27 C)
- Superior Mechanical Hold
- Completely Airtight
- Low Profile- Slides Easily Through Plow Chutes
- Designed For Pressurized Cable Propulsion Systems
