

CERTI-SEAL

Buried Service Wire Closures

- Gel-filled construction seals out environment
- Splice protection
- One-piece, snap-together latching system

Applications

- Splice Protection
- Demarcation Points

The CERTI-SEAL buried service wire closure bonds and protect butt and in-line splices from 2 through 12 pair buried service wires.

Advantages

- Reliable — Integral bonding system applies constant pressure on service wire shield for long-term reliability; gel-filled construction seals out environment and will not leak.
- Easy to Install — One-piece, snap-together latching system; pre-installed gel sealant eliminates special handling
- Meets Telcordia Specification TR-NWT-000251

Part Number		Item Description
522132	AMP-0-569579-1	2-6 pair
D35394	AMP-0-1217195-1	6-12 pair
D14813	AMP-0-1116449-1	2-6 pair LG (Use where more wire storage area is required)
C15570	AMP-0-569671	2-6 pair Buried + COAX
