

C5C-AC Accessories

The C5C family of products provides a fast, easy and reliable wire management system as well as environmental protection. A range of accessories is available to facilitate circuit management:

- various types of marker for individual connections or magazines
- plugs to break individual connections
- plugs to restrict access to selected circuits.

Break plug

This is a plastic device which breaks the circuit when inserted into the access slot of a C5C magazine. It can be used for cutover and office conversions.

Marking plug

The marking plug is a plastic device which denies access of test or break plugs to the circuit when inserted into the access slot of a C5C magazine. It can be used for marking special circuits and for preventing accidental interruption of designated lines.

Numbering set

These plastic parts attach to either side of a C5C magazine to identify circuits. They are typically used on individual magazines and for magazines blocks. They are included with the magazines.

Hinged label holder

This plastic accessory attaches to either side of a C5C magazine to identify groups. It is typically used on Cross Connect Cabinets and BET's.
